### NOTICE OF ALLOWANCE

1. Claims 1-9 are allowed over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The Japanese reference (2000-9292) teaches a frame system for supporting apparatus, comprising a bottom frame member (Figs. 3-4, 23), a top frame member (20), and columns connecting the bottom and the top frame; wherein the bottom frame (23) and the top frame (20) are formed of parallel plates (28, 37) that are connected by a plurality of longitudinal plates (31, 60) and a plurality of transverse plates (33, 60); wherein the longitudinal plates and the transverse plates are joined in a mortise joint, in which the plates having parts constituted from each other (sections [0028-29]), so that the transverse plates extend to an edge of the bottom plates through the longitudinal plates (Fig. 1); wherein the plates are rigidly connected so that less welding is required (section [0012]).

However, the Japanese reference fails to disclose that the transverse plates are extended from one longitudinal plate to the other longitudinal plate, and that the longitudinal plates and the transverse plates are joined in a mortise joint so that the transverse plates extend to an edge of the bottom plates through the longitudinal plates to form a reinforced support for the bottom plates at an external side of the bottom frame member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
